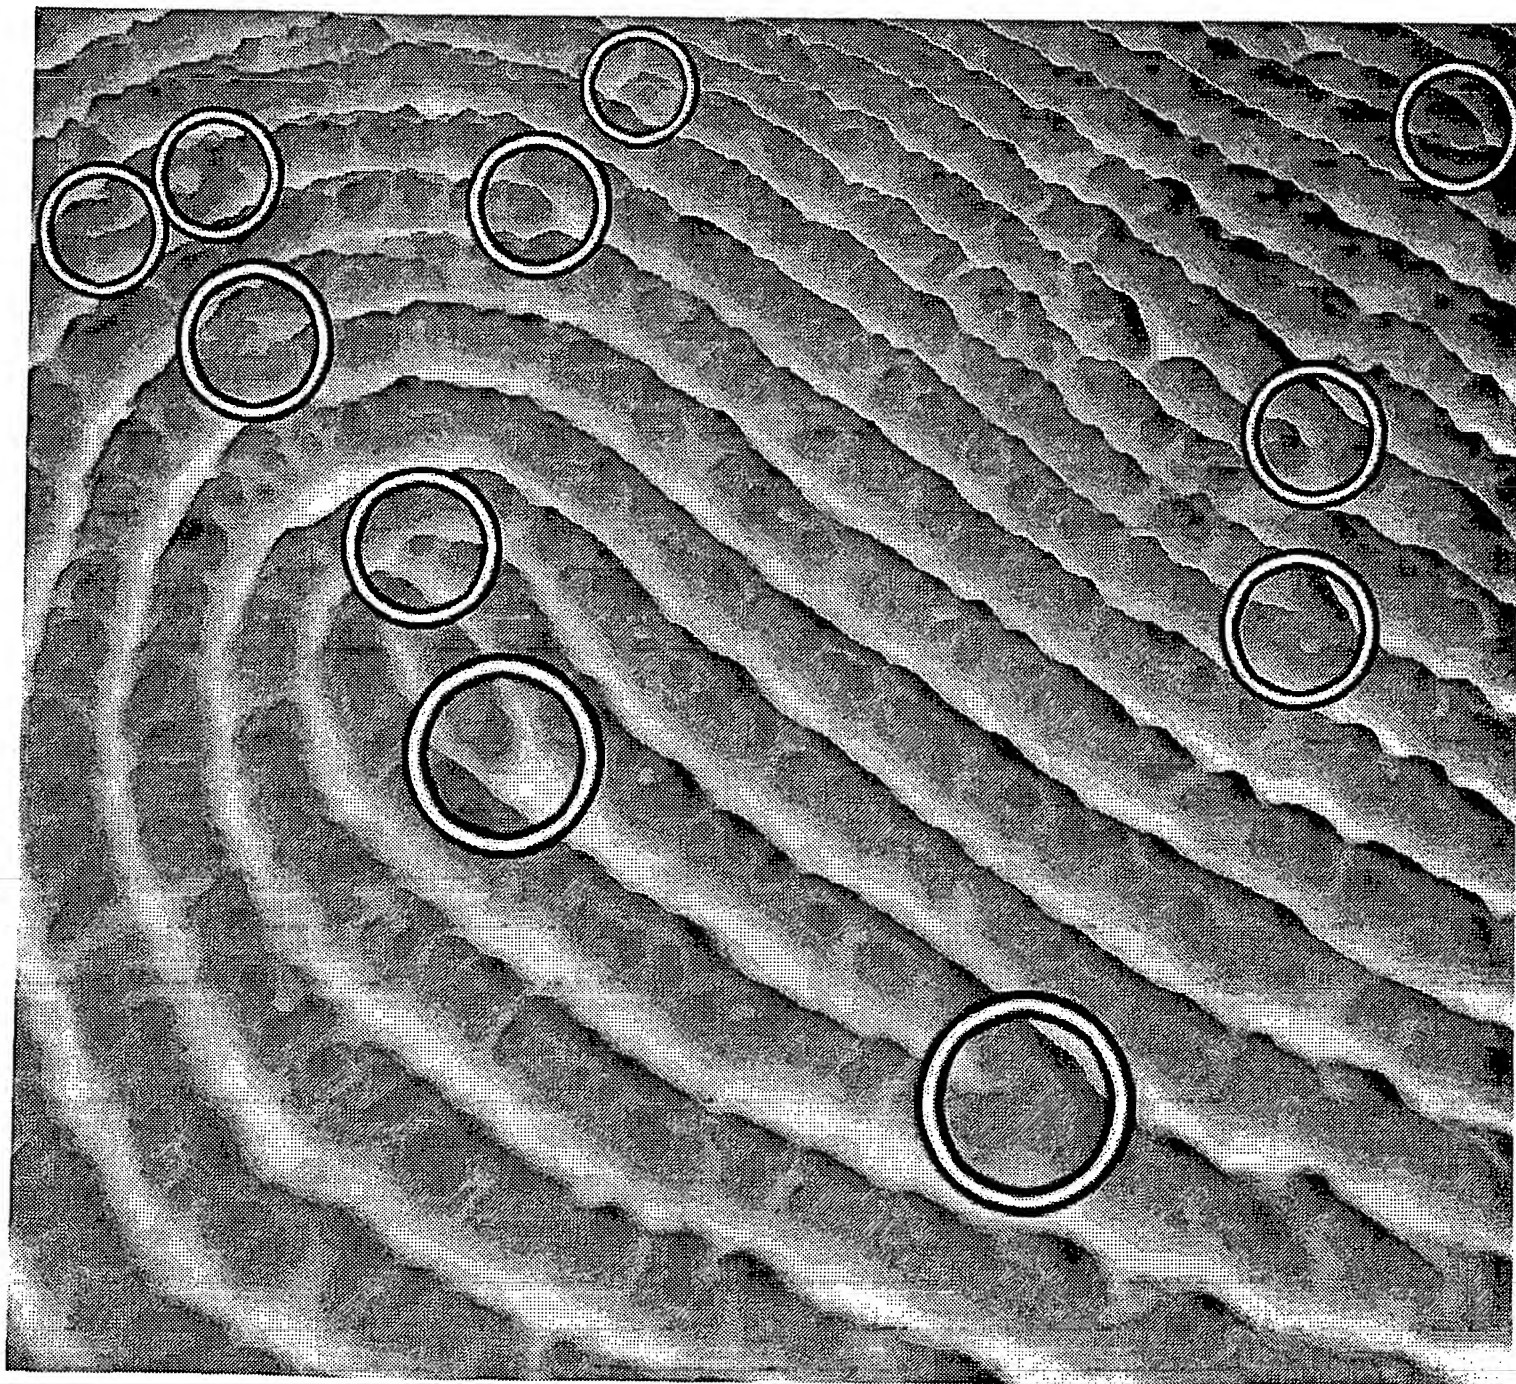

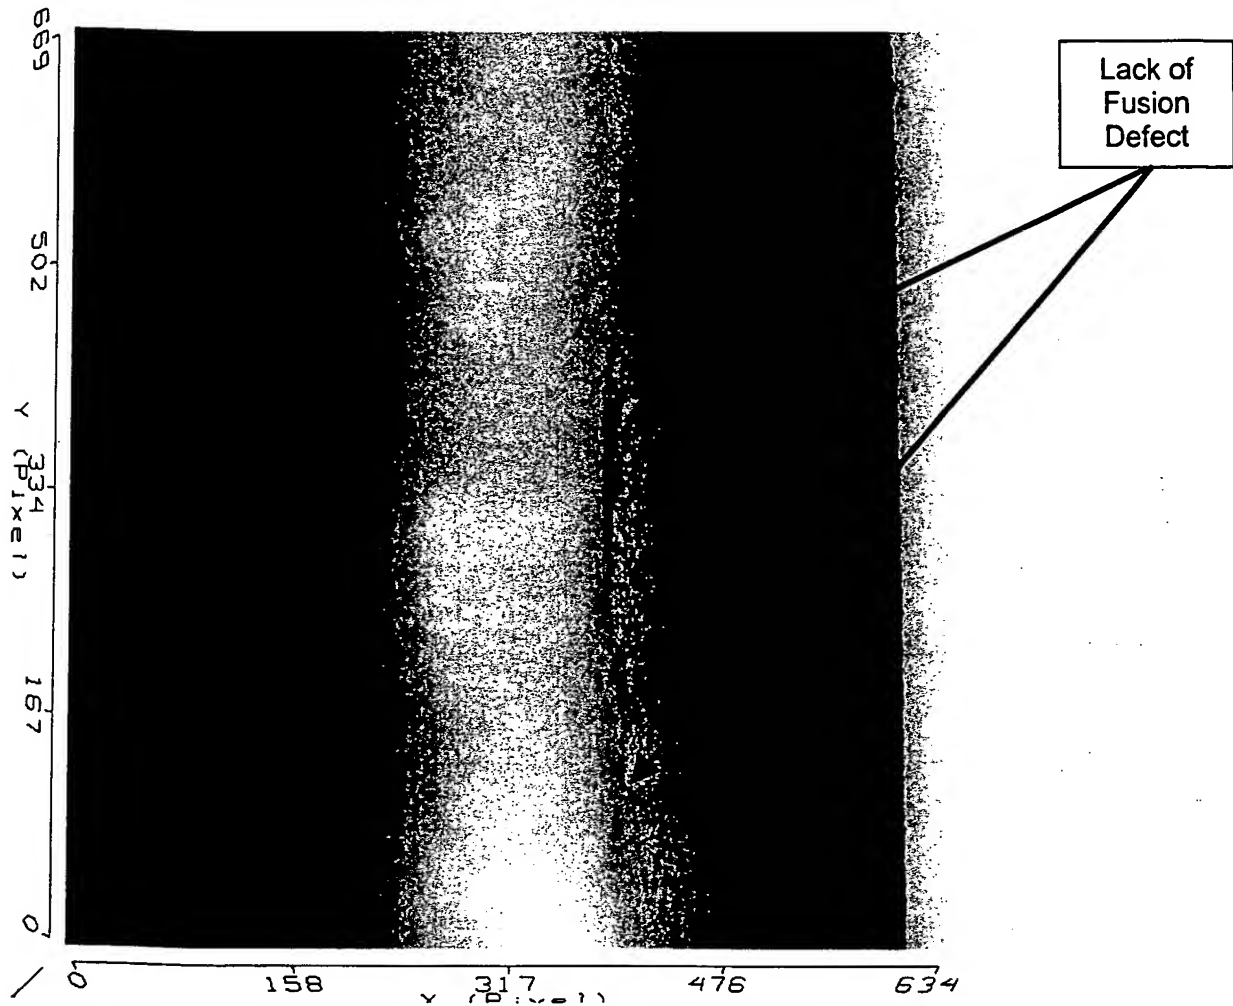

Fig. 35

Grayscale Image of butt weld in one quarter inch flat steel plate. A visible Lack of Fusion defect shows as a darker linear region near the edge of the lighter appearing weld metal.

The same welded plate image rendered as a 3D surface with pseudo-colors added. The Lack of Fusion defect appears to the right of the central "peak" of weld metal deposit. The image has been rotated to give a sense of the 3D nature of the surface.
